

The Tweaksters' Technical Rider

I Personnel...

- One follow spot operator.
- One lighting board operator.
- One stagehand.

II Stage...

- Proscenium or moderate thrust.
- Minimum size of 28' wide by 18' deep with 14' overhead clearance.
- Wings with legs.
- 5 hours load in time. (This includes a one hour meal break for the crew.)
- Four 15 amp electrical outlets stage left. (60 amps total.)
- Two eight foot tables in each wing to place props and costumes on.
- Low wattage running lights with dark blue gels in each wing.
- We briefly use a fog/smoke machine that is water based.
- All central air (air conditioning, heating, fans, vents, etc.) needs to be OFF for the Passing Wind routine. (It's comes at about the 45 minute mark.)

III Floor...

- Surface of linoleum, vinyl or finished wood safe for barefoot dancing.
- Stage and wings clean and clear of obstructions.

IV Sound...

- Amplifier and speakers appropriate for venue.
- One microphone (hand held, wireless or corded).
- Two XLR inputs stage left for music.

V Lighting...

- House must be able to get close to complete darkness.
- A black (or non-UV active) back drop is required.
- One follow spot.
- Current plot and channel information is posted on www.tweaksters.com. This info changes regularly. We bring in moving instruments if driving.

VI Dressing Room...

- One room with 2 chairs, a table, a mirror and sufficient lighting.
- Plenty of non-carbonated bottled water and a bag of ice.

For questions or concerns regarding the above, write regan@tweaksters.com or call 310.394.4964. Please return one copy with the contract.
