

The Tweaksters Lighting Notes

The black rectangles on the lighting plot are where the Tweaksters LED strip fixtures go. On the First and second Electric, they are about 2 feet either side of center. The ideal height of the electrics' pipes is 22 feet. The ideal space between the electrics is 6 feet.

Follow Spot with Roscolux gels 09 (pale amber gold) - 31 (salmon pink) - 33 (no color pink) - 62 (booster blue) - 94 (kelly green)

Booms

One instrument hung 7 feet high with Roscolux 33.

First and Second booms operate separately.

If you don't have booms, we will make do with pipe ends.

Cyc = even wash in Roscolux 27, 83,

Roscolux 27 = (medium red) (or something close)

Roscolux 83 = (medium blue) (or something close)

Roscolux ?? = (amber) (or something close)

Front of House lighting will have two 'looks'. The center section, and the whole stage. Use however many fixtures you wish to accomplish these two looks, generally 2 fixtures is enough for the center section. Each look gets its own channel. Center section... We will mark the spot directly under the center of the first electric with a small piece of glow-in-the-dark tape. This is the center point of a rectangular pool of light from FOH 12' wide. Instruments are focused 5 feet above ground, shuttered at 6' either side of the mark, and the instruments' downstage edges are shuttered 3 feet below the mark. Do NOT shutter the upstage edges of the instruments. (But do keep light off the cyc.)

Washes - We would like and will use red, blue and amber stage washes from the house plot.

First Electric - Special - focused straight down - Roscolux 94 (kelly green) (or something close.)

Other fixed equipment we bring in: 4 ground based DMX moving head fixtures - 4 ground based DMX UV LED fixtures - 4 four foot UV fixtures on stage lip - a video projector with DMX shutter on the stage lip - a video camcorder with mini tripod on the stage lip - ping pong ball canons in both downstage wings. If you have an air compressor, we will use it to inflate large exercise balls.
